

The STX logo is rendered in a white, stylized, outlined font. The letters are bold and modern, with sharp angles and a sense of motion. The 'S' is a continuous loop, the 'T' has a vertical stem, and the 'X' is formed by two intersecting diagonal strokes. The logo is centered horizontally in the upper half of the image.

STX

COLLECTION 2025

WHAT WE OFFER IN 2025

STX WOVEN DROPSTITCH

For our Cruiser boards we use woven dropstitch single layer bottom and deck construction. Double layered side wall, for a bullit proof board construction.

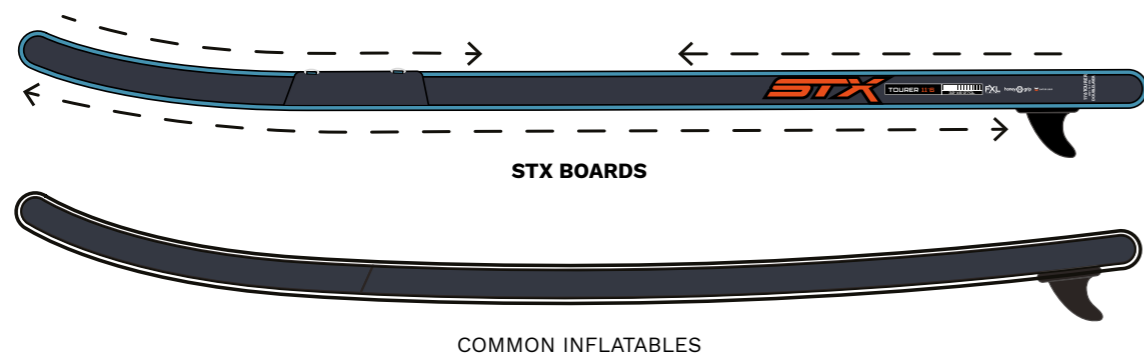

FXL

FEATHER LIGHT CONSTRUCTION

Fusion Double Layer, X light construction. Exclusive on STX boards. The lightest inflatable boards on the market. Woven fabric weighs less. It prevents the material to stretch and holds more tension. Tough and every inch of the board is glued with precision, made by a selected and experienced production team.

STIFF, STIFFER, STIFFEST

A stiff board transfers the power into fastness, not into bending. Woven fabric weight stretch diagonal hold more tension. Your STX board is one of the stiffest boards on the market.

COMMON INFLATABLES

PSI

Although we recommend 15 PSI, every single FXL made board can be inflated beyond 20 PSI. Again another advantage of our FXL technology.

STRENGTH

Tensile strength test show a 50% improvement on Fusion DL. Tearing strength shows even a 100% increase on Fusion DL.

DOUBLE LAYER

STX boards are made to last. Double layer bottom and deck, double layer rails and the best components on the market today.

PREMIUM DETAILS

- HONEYGRIP; smooth, grippy, maximum comfort and strong our well know EVA deckpad
- CORE GRIP; stance area gripdeck with increased grip worked into the EVA
- Stainless steel D-rings for docking the boards, for a strong connection with anything you wish
- Modern flat cord bungee for your bag on all SUP boards
- High pressure valves. Up to 20 PSI, preferred 15 PSI
- Double layer, fusion, deck and bottom
- Premium air valves
- Ergonomic Neoprene Grab Handle

DETAILED ACCESSORIES

- STX pump with fold up stands and vario handles to minimize size and packaging
- STX AIR travel backpack with space for pump, board, paddle and the standard repairkit

SHAPES

CRUISER

Stable boards with a wide outline. The perfect compromise between speed & stability.

TOURER

Streamlined arrow shaped board for higher speeds, high directional stability, faster paddling and longer distances.

RACE

Arrow shaped boards for higher speeds, high directional stability, and faster paddling.

A QUICK GUIDE

The correct mast is all too often overlooked when choosing gear.

At the outset, there are a few great features that all **STX** mast models share. An **XCORE Wrap** on the base of all our masts prevents long term wear and scratches. Another big plus is the **STX Boom Height** indicator.

As any pro worth their salt will attest, several core factors can affect a mast's overall performance. Even if it's paired with the best sail money can buy, this piece of gear should match your **specific riding style and expectations**.

Here's where science comes in. Through some sharp R&D at **STX**, we've refined the ratios of carbon to fiberglass in all our masts. In a nutshell, Carbon percentages translate to critical factors like **Reflex Speed, Durability, Stiffness and Weight**. These factors all pair off against each other to produce varying results that cater to different riders' needs.

Don't fret though - it's not as complicated as it sounds. Check out our simple comparative **diagrams and tables alongside** to see how **STX** models compare to each other.

At the end of the day, all **STX** masts perform brilliantly and look as good as they perform, so you can't really go wrong.

BOOMS

6.0 BOOM

OUR REDUCED DIAMETER GRIP

- 26mm diameter grip area and 29mm at the back of the boom
- Monocoque construction
- Continuous aluminum front and back ends
- Double Lever Pin adjustment system
- 50cm adjustment for maximum sail range coverage

ART.NR. - COLOR 407.70420.000 - Grey/Black/White
SIZE 145-195 / 160-210

SIZE	DIAMETER
145-195	26/29MM
160-210	26/29MM

2.0 BOOM

ENTRY-LEVEL BOOM WITH EXCELLENT STIFFNESS AND DURABILITY

- Continuous aluminum front end with indestructible clamp
- 1.4 mm wall thickness and 29mm diameter
- Single Pin adjustment system
- 60cm adjustment for maximum sail range coverage

ART.NR. - COLOR 407.70400.000 - Grey/Black/White
SIZE 137-198 / 162-122

SIZE	DIAMETER
137-198	29MM
162-122	29MM

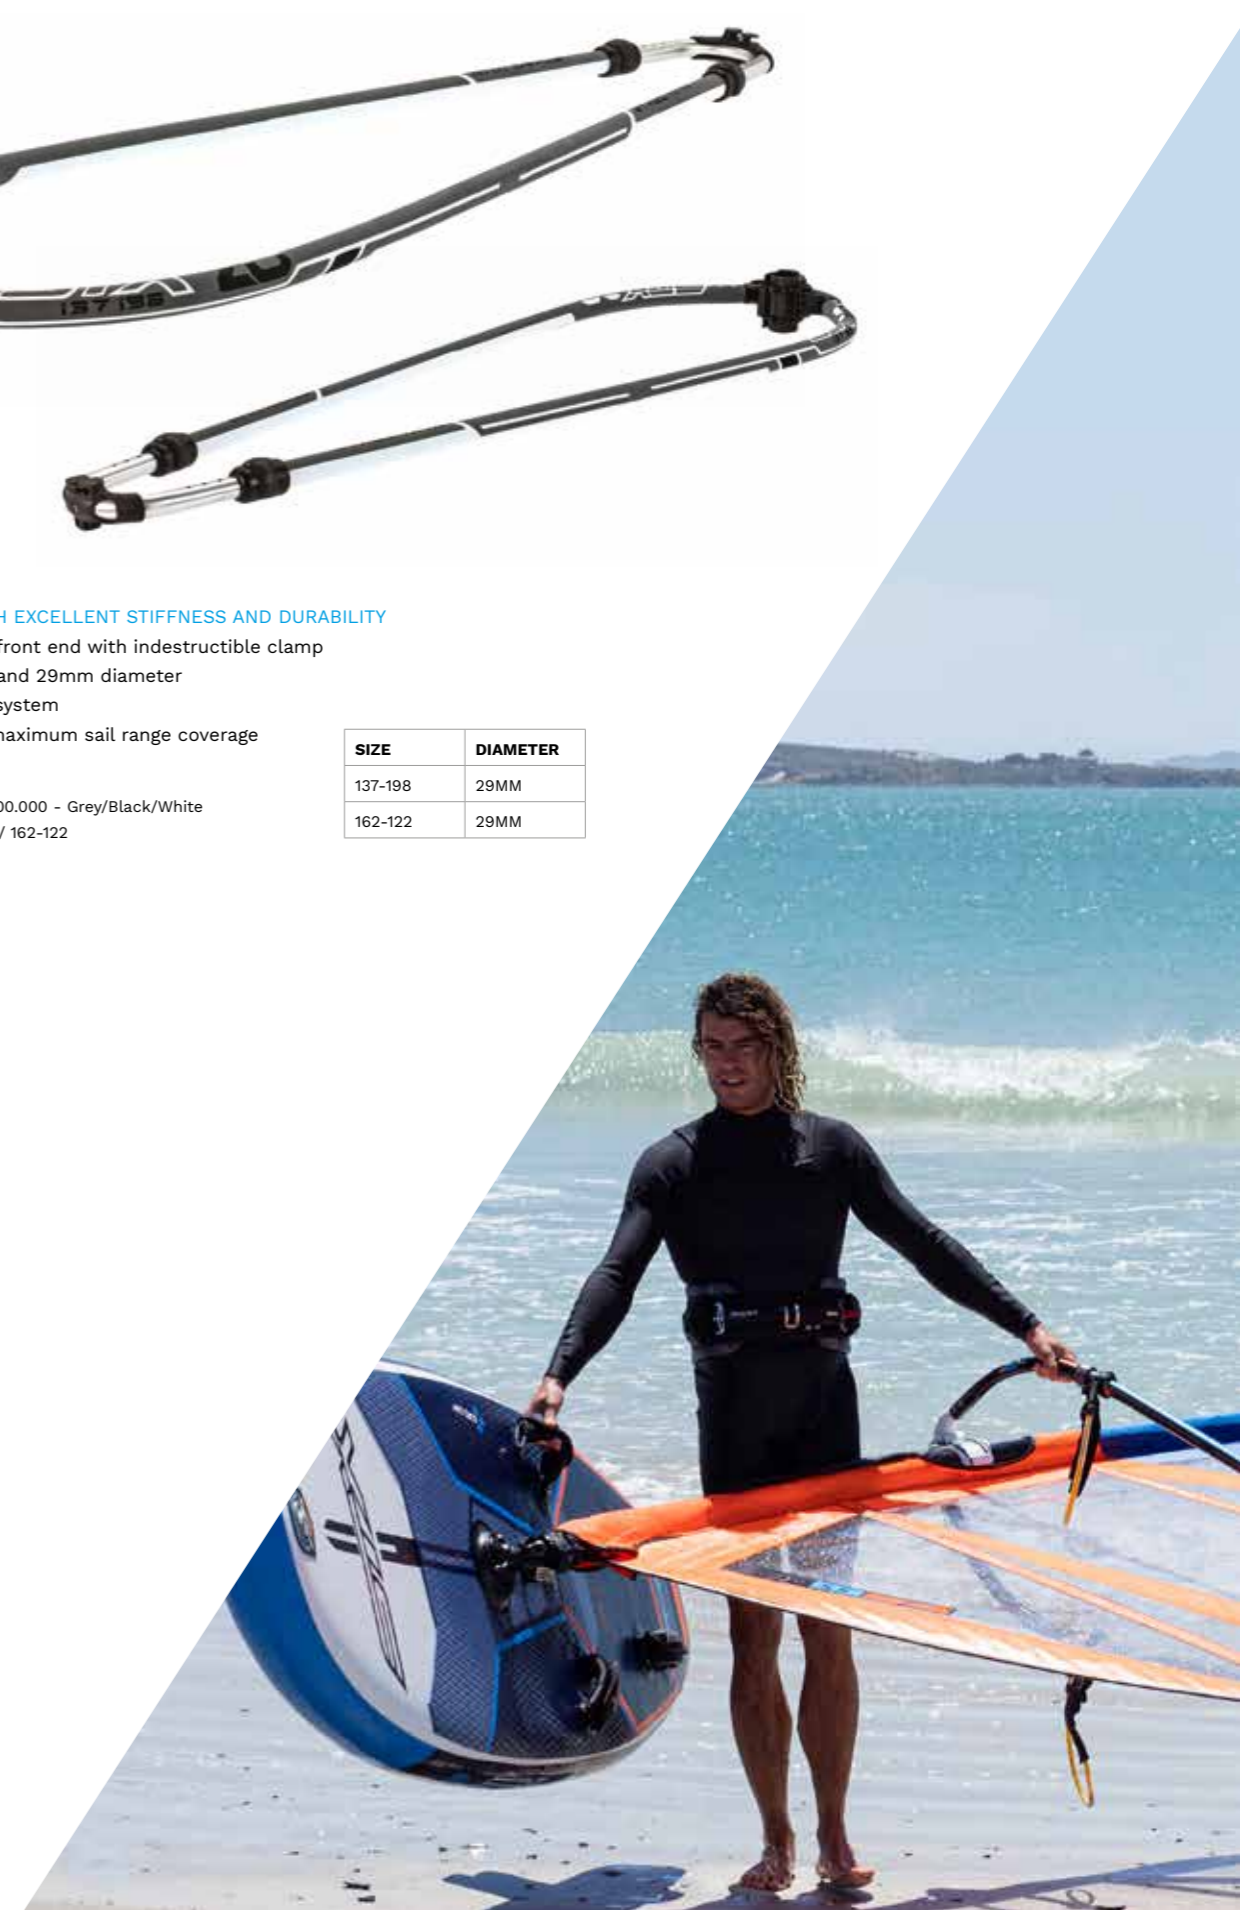

4.0 BOOM

HIGH PERFORMANCE BOOM DEVELOPED FOR MAXIMUM STRENGTH AND FUNCTIONALITY

- Specific boom profile and monocoque construction
- 1.5mm wall thickness, 29mm diameter
- Continuous aluminum front end and back end
- 60cm adjustment for maximum sail range coverage
- Optimized stiffness
- Twin Pin Adjustment system

ART.NR. - COLOR 407.70410.000 - Grey/Black/White
SIZE 137-198 / 162-222 / 183-244 / 202-262
